EPISUITE™

LITE

EPISUITE is a ready-to-use software application for ID badge design and management. EPISUITE allows users to design ID cards; capture photographs, maintain a secure database of cardholder information; and encode magnetic stripes and bar codes.

EPISUITE Lite

A cost-effective solution for small organizations such as clubs, health care facilities, or businesses where a single person designs and manages badges.

Need to offload large print jobs or service remote offices? EPISUITE's remote print feature allows you to send print jobs to an EPIWEB™ service bureau.

The EPISUITE software application includes the following components:

GuardDraw

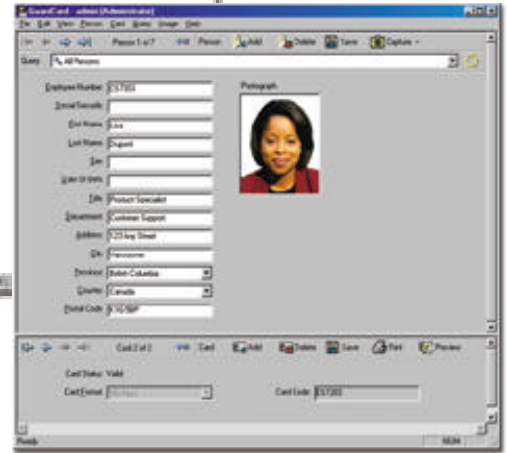

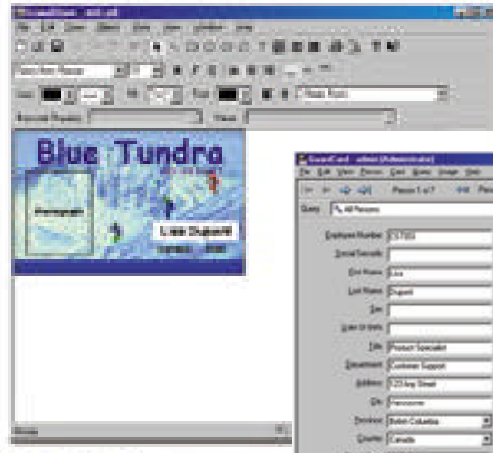

GuardDraw lets you create any number of professional-looking, full-color ID badge designs. You can import eye-catching graphics to use as card backgrounds and personalize your designs with your organization's logo. Link your templates to information and photographs maintained in your cardholder database. Add bar codes or encode magnetic stripes – all within the same software! Even if you're not a design professional, you'll get superb results in minutes with EPISUITE.

GuardCard

Don't know the first thing about databases? No problem. EPISUITE makes database maintenance a snap. Create your own cardholder records with a single click and simply type in the relevant information. EPISUITE keeps a copy in its database, safe from any tampering. Another click and you can add photographs from existing files, digital cameras and scanners, or capture them live with any camcorder. Need to reprint a lost card? Simply use GuardCard's powerful search feature and print it again.

GuardTool Reports

Need to know what happened to a badge or review information in your database? GuardTool Reports provides you with the information that you need at the click of a button.

GuardTool Database Utilities

Customize, backup, restore, compact and repair your EPISUITE database quickly.

GuardTool Importer

A simple, wizard-driven utility that takes the mystery out of importing information and images directly into EPISUITE, even from databases used by other systems!

NEW:

- *Enhanced card design features*
- *Remote print feature which permits you to send print jobs to an EPIWEB™ service bureau*

Feature Highlights

- Runs on Microsoft Windows 95/98, 2000, Me and NT4.0
