**PRODUCT INTRO****SAP Business One****Making Your Business a Best-Run Business**

TFCS is launching SAP Business One, which is definitely affordable for customers to achieve a rapid return on their investment.

SAP Business One is also simple to use, giving all of the users a consistent, intuitive environment that they can learn quickly and use effectively. And it is powerful, enabling customers to manage their business today and grow to new levels of success.

The solution offers functionality to optimize every aspect of different sectors, from financial accounting to manufacturing to sales and service. It also delivers truly innovative features, including a five-step MRP Wizard that automates material requirements planning, and a Drag&Relate tool that lets users link different pieces of information with a single mouse click.

With SAP Business One, customers can achieve a new level of control and increase the profitability of business. Surely employees can get the information they need, when and how they need it. And they can easily customize the solution to meet their changing requirements time by time. **TF**

PRODUCT INTRO

DATACARD® SP25 CARD PRINTER

DatacardGroup
SECURE ID AND CARD PERSONALIZATION SOLUTIONS

Designed for low volume, manual feed, simplex card printing with re-writable functionality. The value-priced SP25 card printer combines high-quality, full-color card printing and innovative rewritable card technology in a cost-effective design that is ideal for small ID programs and/or card programs which require a reusable card.

This affordable, dual-function card printer possesses a unique combination that is ideal for a wide variety of single-card printing applications including color photo ID printing, rewritable capabilities and cards that use both technologies, especially for Education (Primary & Secondary), small corporations (100 employees or less), loyalty & retail industry, resort and hospitality markets. **TF**

1. User feeds a rewritable card
2. SP25 printer erases every pixel
3. SP25 printer rewrites new data at 300 dpi
4. User receives a finished card in 20 seconds

SUCCESSFUL REVIEW

Computershare – A New Challenge for TFHK

Have you ever put an eye on the Hong Kong stock market? Nowadays, share registration of banks in Hong Kong becomes a talk of the town. Computershare Hong Kong Investor Services Ltd., is actively providing a comprehensive range of share registration and related services to listed companies.

Starting from 2005, TFHK DMS keeps working closely with Computershare. How can DMS link with share registry business? During the period of Initial Public Offering (IPO), share certificate and refund cheque are issued to shareholders and unsuccessful applications respectively. Definitely, that is our DMS! TFHK offers the instant variable data printing service with mass mailing operation that Computershare requires. With the strong production capacity, reliable quality control assurance and professional service level in a short turnaround time, Computershare is confident to partner with TFHK.

See, the successful share registration in Hong Kong of the 4 major China banks, are our powerful reference! **TF**

TFCT Free-Form Baggage Tag for an U.S. Airline Loyalty Program

Imagine that you are the marketing people of an airline company, you have to prepare a premium with additional recognition for your valuable members every year. Something must be tailor-made, personalized and relevant to the airline business. What do you think?

In 2006, what TFCT provides is the best suit to these criteria. Premium Elite members of the airline club gets a pair of baggage tag in special die-cut with their name thermally printed on. Users can leave one of the tag on their baggage and keep one for record. It is much easier for them to get back their stuff with the tag. Totally 600,000 sets of baggage tag are produced. It's amazing to see all the tags appear in the airport at the same time! **TF**

SPECIAL SHARING

Mountain Story. A son and his father are walking on the mountains. Suddenly, his son falls, hurts himself and screams: “AAAhhhhhhhhh!!!” To his surprise, he hears the voice repeating, somewhere in the mountain: “AAAhhhhhhhhhhh!!!”

Curious, he yells: “Who are you?” He receives the answer: “Who are you?”

And then he screams to the mountain: “I admire you!” The voice answers: “I admire you!”

Angered at the response, he screams: “Coward!” He receives the answer: “Coward!”

He looks to his father and asks: “What’s going on?” The father smiles and says: “My son, pay attention.” Again the man screams: “You are a champion!” The voice answers: “You are a champion!”

The boy is surprised, but does not understand. Then the father explains: “People call this ECHO, but really this is LIFE. It gives you back everything you say or do. Our life is simply a reflection of our actions. If you want more love in the world, create more love in your heart. If you want more competence in your team, improve your competence. This relationship applies to everything, in all aspects of life. Life will give you back everything you have given to it.”

YOUR LIFE IS NOT A COINCIDENCE. IT'S A REFLECTION OF YOU! TF

**RFID EXPRESS****TNT Uses RFID To Track Temperatures of Sensitive Goods**

TNT, a logistics and global express-services provider, is introducing a new RFID service in Asia. This service tracks temperature levels associated with health-care, pharmaceutical and chemical goods as they move along the supply chain. It is designed to assure companies their products are stored and shipped at the correct temperature, becoming neither too hot nor too cold while in transit.

The 2.4 GHz battery-assisted passive (BAP) tags can be programmed to turn on at any designated intervals, take temperature reads and then turn off again. When the goods arrive at their final destination, an RFID interrogator deactivates the tags and reads the recorded temperature data, automatically uploading it to software maintained by TNT.

The company offers logistics services in 36 countries and is now planning to roll out its RFID cold-chain solution to other regions in which it currently provides services. TF
